Appln. No. 09/686,125
Amendment Dated: _____, 2004
Reply to Office Action of January 12, 2004

Amendments to the Claims:

1. (Previously Presented)   A system for exchanging communications between a mobile device and a network site, the system comprising:

a conversion engine coupleable to a mobile device to accept a request for a content from a network site, the request being signaled from the mobile device in a first language and the content being structured in a second language, the conversion engine being coupleable to the network site to retrieve the content from the network site in response to receiving the request, the conversion engine including logic to convert the content from the second language to the first language and signaling the content to be rendered as one or more pages on the mobile device,

wherein the first language allows only a single input entry per page, and the second language allows for multiple input entries per page,

and wherein the conversion engine restructures a plurality of internal links in the content rendered on the mobile device, and wherein the restructured internal links are selectable on the mobile device to generate a second request for another content from a second network site without the conversion engine converting the second request to the second language.
